Associate Diploma in Civil Engineering  
(Queensland University of Technology)

Queensland Radiation Safety Officer  
(Queensland University of Technology)

NATA Signatory – Soils, Aggregate and  
Concrete Testing

Associate Member: Institute of Engineers  
Australia

Ian has been with the company since 1987, working in his current role as Gold Coast Laboratory Manager since 1995. Ian's experience covers all facets of civil construction and quality compliance testing. This experience is reflected in his broad range of projects which include major infrastructure developments and upgrades such as M1 Motorway and Brisbane to Gold Coast Rail Line, major shopping centres and small to large residential and commercial subdivisions.

Ian's special interests include geotechnical investigations to aid in structural design and include failed structure and pavement assessments.

His core work on the Gold Coast is in compaction control of earthworks and road construction, quarry quality testing, Level One Earthworks observation and water quality testing. Ian's involvement in any construction team ensures the creation of robust foundations for buildings and infrastructure.

### Recent Project Experience

- Pacific Motorway – Exit 54 Interchange  
Test Pit Supervision, Sampling and Testing.
